ABOUT ME

I'm a Front-End Developer who enjoys creating clean and responsive websites. I have experience with HTML, CSS, JavaScript, React, and Bootstrap. I like solving problems, learning new things, and improving my skills. Right now, I'm also learning back-end technologies like Node.js and MongoDB. I'm looking for a good opportunity where I can grow and work with a great team.

PROJECTS

To-Do List App
https://jaimin-todo-app.netlify.app/

I created a task manager using HTML, CSS, and JavaScript where users can add, edit, and delete tasks. I also used localStorage so that tasks stay saved even after the page is refreshed.

Weather App
https://jaimin-weather-app.netlify.app/

This project shows the current weather of any city using a weather API. I focused on making the design simple and responsive so it works well on mobile and desktop devices.

Tic-Tac-Toe Game
https://jaimin-tic-tac-toe-app.netlify.app/

I built a two-player Tic-Tac-Toe game using HTML, CSS, and JavaScript. It includes win detection, a reset option, and some smooth animations for a better user experience.

Personal Portfolio Website
https://jaimin-personal-portfolio-app.netlify.app/

I designed my personal portfolio using React to showcase my projects, skills, and contact information. The website is fully responsive and easy to navigate on all devices.
